

Bronze Package

Remote Deployment | 30 Days

Who should consider this Package?

The Egnyte Bronze Package is our 'quick start' package, which includes remote deployment consulting for 30 days and is optimal for smaller organizations looking to deploy Egnyte cloud services quickly and easily to end users. This package includes data migration services for up to 2 TB of data, 2 remote training sessions, and assistance with up to 2 Storage Sync & Connect installs by devices.

Egnyte's Commitment to Customer Success

The Egnyte Professional Services team works with your organization to ensure you are taking full advantage of all the features and functionality that Egnyte provides. We have a proven track record of helping customers accelerate the time to deploy while ensuring each configuration meets best practice standards. Our team will work closely with your IT staff via remote sessions to assist with implementation, which will enable Egnyte to be deployed out to your end users quickly and effectively.

Online Resources

You will receive access to our Getting Started portal, which provides access to knowledge base articles, webinars, communities, and videos. You will also have access to Egnyte University, which offers a number of training courses to help educate your end users. This access, along with Egnyte's Helpdesk, will provide you the resources necessary to educate your users and ensure your launch is successful.

Deployment Roadmap

With the Bronze Package, we will provide direct consulting assistance from one of our experienced technical consultants. We will also provide you with a Deployment Guide that will take you step-by-step through the best process for implementing your Egnyte instance.

"Our Egnyte Professional Services consultant was very patient and responsive with us throughout the process. I truly appreciated having him on the team during our transition of all our files to the cloud. I have learned so much during the entire process. Thank you!"
