

Mobile Optimized Websites

Create a high quality mobile website that generates value, increases customer loyalty and grows revenue.

With four mobile phones for every PC, mobile is ramping up faster than any other technology we have seen in the past. Mobile-ready sites are proven to increase sales, generate traffic and boost engagement. Businesses that do not accommodate the mobile user are losing out on significant opportunities and revenue. Mobile traffic is more likely to convert to sales when mobile users can easily find key content while on-the-go.

goMobi from CenturyLink offers businesses a fast and easy way to create a mobile optimized website that drives traffic, converts leads and grows revenue. Build a new web site or leverage the design and content from your existing web site, built for PCs and laptops, to create a mobile friendly site in minutes without any coding. Built on a highly extensible platform, goMobi leverages dotMobi's powerful device detection and content adaptation solution that can adapt to the changing needs of any business.

goMobi mobile sites can be created quickly and easily without any technical knowledge allowing you to create a mobile presence in a matter of minutes. Leverage your existing site content or create a custom site using the 30+ made-for-mobile features, or create your site using a hybrid of both. goMobi from CenturyLink has a variety of interface templates that deliver a great experience on ANY mobile device, not just smartphones, to ensure an effortless user experience that is fast and easy for your customers to use. gain full access to all the drop ship wholesalers and their wholesale product catalogs. Compliment your product offerings by selecting and selling other wholesaler's products directly through your website.
